

CANDIDATE ID: CV02 | LEVEL: JUNIOR | PROFILE: Cybersecurity Analyst

PROFESSIONAL SUMMARY

Motivated Cybersecurity Analyst at the junior level with approximately 1 year of professional experience in security operations. Background in Information Security with a focus on threat monitoring, incident response support, and security awareness. Familiar with SIEM tools and basic endpoint detection concepts. Seeking to build expertise in network security and cloud security domains to progress toward a mid-level security engineering role.

EDUCATION

Bachelor of Science in Information Security

Graduation Year: 2022

Associate Degree in Networking and Systems Administration

Graduation Year: 2020

WORK EXPERIENCE

Cybersecurity Analyst I

Financial Technology Startup | Aug 2022 – Present (2 years)

- Monitored security events and alerts using Microsoft Sentinel SIEM.
- Triaged and investigated security incidents, documenting findings in ticketing system.
- Assisted in creation of playbooks for common alert types (brute force, phishing, malware).
- Conducted phishing email analysis and reported indicators of compromise (IOCs).
- Supported patch management coordination with IT team for endpoint vulnerabilities.
- Participated in tabletop incident response exercises.
- Generated weekly security metrics reports for management review.

IT Support Technician (Part-time while studying)

University IT Department | 2020 – 2022

- Provided technical support for network connectivity and device configuration.
- Managed user accounts in Active Directory.
- Assisted with basic network troubleshooting (DHCP, DNS, routing).

TECHNICAL SKILLS

SIEM/Monitoring: Microsoft Sentinel, Splunk (basic), IBM QRadar (exposure)

Endpoint Security: Microsoft Defender for Endpoint, CrowdStrike Falcon (basic)

Network Analysis: Wireshark, tcpdump

Threat Intelligence: VirusTotal, AlienVault OTX, MITRE ATT&CK Framework

Identity/Access: Azure Active Directory, Microsoft 365 Admin

Email Security: Proofpoint (basic), Microsoft Defender for Office 365

Ticketing: ServiceNow, Jira

Scripting: Python (basic automation scripts), PowerShell (basic)

OS: Windows Server, Linux (Ubuntu)

Frameworks: NIST CSF (conceptual), ISO 27001 (awareness)

SOFT SKILLS

- Analytical mindset with attention to security event details
- Clear written communication for incident documentation
- Teamwork and collaboration within SOC environment
- Continuous learning attitude toward evolving threat landscape
- Calm and structured approach under pressure
- Ability to explain technical concepts to non-technical stakeholders

CERTIFICATIONS

- CompTIA Security+ (SY0-701) — 2022

- CompTIA CySA+ (CS0-003) — 2023
- Microsoft SC-200 (Security Operations Analyst) — 2023
- MITRE ATT&CK Fundamentals Badge — 2022

LANGUAGES

- English: Full professional proficiency (C1)
- Portuguese: Basic (A2)
- Spanish: Native

RELEVANT PROJECTS

Project 1: SOC Automation with Python (Internal, 2023)
Developed a Python script to automate enrichment of SIEM alerts by querying VirusTotal and Shodan APIs, reducing manual investigation time by approximately 30% for IP and hash lookups.

Project 2: Phishing Campaign Simulation (Internal, 2023)
Assisted in planning and executing a phishing simulation for 200 employees using GoPhish. Analyzed results and contributed to a targeted security awareness training program.

Project 3: Threat Hunting Use Case Development (Internal, 2024)
Collaborated with senior analysts to build KQL queries in Microsoft Sentinel to detect anomalous login behavior, lateral movement attempts, and privilege escalation patterns.

NOTE: This is a synthetic CV generated for academic research purposes. Personal identifiers (name, photo, gender, age, nationality, marital status) have been intentionally omitted to protect candidate privacy and ensure bias-free evaluation.
