

CANDIDATE ID: CV04 | LEVEL: JUNIOR | PROFILE: Software Developer (Backend)

PROFESSIONAL SUMMARY

Junior Backend Software Developer with 1.5 years of professional experience building REST APIs and microservices using Python and Node.js. Strong foundations in software engineering, database design, and agile methodologies. Basic understanding of application security principles such as OWASP Top 10 and secure coding practices. Interested in expanding knowledge in cloud-native development and DevSecOps pipelines.

EDUCATION

Bachelor of Science in Software Engineering

Graduation Year: 2022

WORK EXPERIENCE

Junior Backend Developer

Fintech Startup | Mar 2022 – Present

- Developed and maintained RESTful APIs using Python (FastAPI) and Node.js (Express).
- Designed and managed PostgreSQL and MongoDB database schemas.
- Implemented JWT-based authentication and basic role-based access control (RBAC).
- Participated in code reviews, addressing security vulnerabilities flagged by SonarQube.
- Integrated third-party payment APIs with proper credential management via AWS Secrets Manager.
- Collaborated with frontend team to define API contracts and data formats.
- Contributed to containerization of services using Docker and deployment via GitHub Actions.

Intern Software Developer

Digital Agency | Jan 2022 – Mar 2022

- Assisted in building web applications using React and Django.
- Performed unit testing and bug fixing tasks.
- Participated in sprint planning and daily standups.

TECHNICAL SKILLS

Languages: Python, JavaScript (Node.js), SQL

Frameworks: FastAPI, Express.js, Django (basic)

Databases: PostgreSQL, MongoDB, Redis

Security (basic): OWASP Top 10 awareness, JWT, HTTPS/TLS, input validation

DevOps (basic): Docker, GitHub Actions, basic AWS (EC2, S3, Secrets Manager)

Tools: Git, Postman, SonarQube, Jira, VS Code

Testing: Pytest, Jest

Networking basics: HTTP/HTTPS, REST, WebSockets

SOFT SKILLS

- Strong coding discipline and code quality awareness
- Collaborative mindset in cross-functional teams
- Ability to read and understand technical documentation quickly
- Attention to detail in API design and error handling
- Proactive communication about blockers and progress
- Eagerness to adopt best practices and new frameworks

CERTIFICATIONS

- AWS Cloud Practitioner — 2022
- Python Institute PCEP (Certified Entry-Level Python Programmer) — 2021
- OWASP Top 10 Awareness Training Certificate — 2023

LANGUAGES

- English: Professional working proficiency (B2)
- Spanish: Native

RELEVANT PROJECTS

Project 1: Secure Payment API (Work, 2023)
Developed a payment processing microservice with end-to-end encryption, idempotency keys, and webhook signature verification. Integrated with Stripe and handled PCI DSS compliance requirements at the application layer.

Project 2: Role-Based Access Control Module (Work, 2022)
Designed and implemented a modular RBAC system for a multi-tenant SaaS application. Supported custom permission sets, audit logging of access events, and integration with OAuth 2.0 provider.

Project 3: Personal Portfolio API (Personal, 2022)
Built a public REST API for a personal portfolio with rate limiting, API key authentication, and automated CI/CD deployment to AWS EC2 using GitHub Actions.

NOTE: This is a synthetic CV generated for academic research purposes. Personal identifiers (name, photo, gender, age, nationality, marital status) have been intentionally omitted to protect candidate privacy and ensure bias-free evaluation.
