

CANDIDATE ID: CV05 | LEVEL: JUNIOR | PROFILE: Business Intelligence (BI) Analyst

PROFESSIONAL SUMMARY

Junior Business Intelligence Analyst with 1 year of experience designing dashboards, conducting data analysis, and supporting data-driven decision making in retail and e-commerce sectors. Proficient in Power BI and SQL with growing expertise in Python for data manipulation. No direct cybersecurity background, though familiar with basic data governance concepts and GDPR compliance requirements relevant to analytics pipelines.

EDUCATION

Bachelor of Science in Business Administration with Data Analytics Concentration

Graduation Year: 2022

Certificate in Business Intelligence and Data Visualization

Duration: 4 months, completed 2022

WORK EXPERIENCE

Junior BI Analyst

E-commerce Retail Company | Jul 2022 – Present

- Developed and maintained Power BI dashboards for sales, inventory, and customer behavior KPI tracking (15+ reports serving 50+ business users).
- Wrote complex SQL queries in PostgreSQL and Snowflake to extract and transform data for reporting purposes.
- Collaborated with data engineering team to define data pipeline requirements.
- Created automated Excel and Power BI reports replacing manual weekly processes, saving approximately 8 hours/week.
- Assisted in data quality checks and validation of ETL pipeline outputs.
- Documented data dictionary and business glossary for reporting metrics.
- Participated in GDPR data mapping exercise to identify personal data in analytics systems.

Data Entry and Reporting Assistant (Part-time while studying)

Logistics Company | 2021 – 2022

- Compiled weekly operational reports using Excel pivot tables and charts.
- Coordinated with operations team to gather and validate data.

TECHNICAL SKILLS

BI/Visualization: Power BI (intermediate), Tableau (basic), Excel (advanced)

Databases/SQL: PostgreSQL, Snowflake, MySQL, SQL Server

Data Prep: Python (Pandas, NumPy – basic), Google Sheets

ETL/Pipelines: Basic knowledge of dbt, Airflow (exposure)

Cloud (basic): Google BigQuery, AWS S3 (data storage concepts)

Data Governance: GDPR awareness, basic data classification

Reporting: DAX (basic), Power Query (M language – basic)

Tools: Jira, Confluence, Git (basic)

SOFT SKILLS

- Strong analytical and quantitative reasoning skills
- Ability to translate business questions into data queries
- Clear data storytelling and visual communication
- Stakeholder management and requirements gathering
- Team collaboration in cross-functional projects
- Structured approach to data validation and quality assurance

CERTIFICATIONS

- Microsoft Power BI Data Analyst Associate (PL-300) — 2023

- Google Data Analytics Professional Certificate — 2022
- SQL for Data Science (Coursera) — 2021
- GDPR Essentials Training Certificate — 2023

LANGUAGES

- English: Full professional proficiency (C1)
- Spanish: Native
- Italian: Basic (A2)

RELEVANT PROJECTS

Project 1: Customer Churn Dashboard (Work, 2023)
Built an interactive Power BI dashboard tracking customer churn signals across 5 product lines. Identified a 12% churn increase in a specific segment, leading to a targeted retention campaign that reduced churn by 4%.

Project 2: Inventory Optimization Analysis (Work, 2023)
Performed SQL-based analysis of 18-month inventory data to identify overstock and stockout patterns. Delivered recommendations adopted by the supply chain team, reducing excess inventory costs by approximately 7%.

Project 3: GDPR Data Mapping for Analytics (Work, 2023)
Participated in a company-wide GDPR compliance project to map personal data flows within analytics systems. Documented 30+ data elements and assisted in implementing data anonymization in reporting datasets.
