

CANDIDATE ID: CV07 | LEVEL: INTERMEDIATE (SEMI-SENIOR) | PROFILE: Technical Security Consultant

PROFESSIONAL SUMMARY

Technical Security Consultant with 5 years of experience advising enterprise and government clients on network security architecture, security policy design, and technology platform selection. Proven ability to bridge technical and business requirements, translating complex security concepts for executive and non-technical stakeholders. Experience with SASE/SSE platforms, identity and access management, and cloud security design. Track record delivering security design reviews, RFP technical evaluations, and proof-of-concept implementations for leading security vendors.

EDUCATION

Bachelor of Science in Computer Science, Minor in Information Security

Graduation Year: 2018

Master of Science in Cybersecurity (Part-time, in progress)

Expected Graduation: 2025

WORK EXPERIENCE

Technical Security Consultant (Mid-Level)

Big Four Consulting Firm – Cybersecurity Practice | Sep 2021 – Present (3 years)

- Delivered network security architecture assessments for 12+ enterprise clients across financial services, healthcare, and retail sectors.
- Evaluated and recommended SASE/SSE platforms (Zscaler, Palo Alto Prisma Access, Fortinet FortiSASE) based on client requirements, cost, and integration complexity.
- Developed zero-trust network access (ZTNA) roadmaps and implementation plans for clients transitioning away from legacy VPN architectures.
- Facilitated technical workshops and security design sessions with client architecture and engineering teams.
- Created detailed technical proposals, RFP responses, and security design documents.
- Performed gap analysis against NIST CSF, CIS Controls, and ISO 27001 frameworks.
- Provided pre-sales technical support and proof-of-concept designs for vendor partner engagements.

Network Security Engineer

Regional ISP / Managed Security Service Provider | Jun 2018 – Aug 2021

- Managed firewall environments for 20+ managed security service clients (FortiGate, Palo Alto, Cisco).
- Implemented and managed site-to-site VPN and remote access VPN solutions.
- Provided Tier 2/3 escalation support for network security incidents.
- Developed SOC runbooks and escalation procedures.
- Trained junior engineers on firewall policy management and troubleshooting.

TECHNICAL SKILLS

SASE/SSE Platforms: Zscaler (ZIA/ZPA), Palo Alto Prisma Access, Fortinet FortiSASE, Netskope (exposure), Cisco Umbrella

NGFW: Fortinet FortiGate, Palo Alto Networks NGFW, Cisco FTD

Zero Trust/ZTNA: FortiClient ZTNA, Zscaler ZPA, identity-based policy design

IAM Integration: SAML 2.0, OAuth 2.0, OIDC, Azure AD/Entra ID, Okta

MFA implementation (Duo, Microsoft Authenticator)

Cloud Security: AWS Security Hub, Azure Defender, Cloud-delivered security services

Networking: BGP, OSPF, SD-WAN, IPsec, DNS, NAT, TCP/IP fundamentals

Security Frameworks: NIST CSF, CIS Controls v8, ISO 27001, Zero Trust (NIST SP 800-207)

Scripting: Python (automation), Terraform (basic IaC)

Documentation: Technical architecture diagrams (Visio, draw.io), proposals

SOFT SKILLS

- Excellent verbal and written communication for technical and executive audiences
 - Strong advisory and consultative approach to client engagements
 - Ability to manage multiple concurrent client projects and priorities
 - Skilled at facilitating workshops and presenting to large audiences
 - Persuasive proposal writing and technical storytelling
 - Intellectual curiosity and continuous professional development mindset
-

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP) — 2022
 - Palo Alto Networks PCNSE — 2021
 - Fortinet NSE 7 – Enterprise Firewall — 2022
 - Zscaler ZDTA (Zero Trust Certified Associate) — 2023
 - AWS Security Specialty — 2023
-

LANGUAGES

- English: Native / Full professional proficiency
 - German: Intermediate (B1)
 - Spanish: Basic (A2)

RELEVANT PROJECTS

Project 1: SASE Architecture Design for Global Retailer (2023)

Led the architecture design of a full SASE implementation for a 10,000-user global retail enterprise. Designed SWG, CASB, ZTNA, and FWaaS components, integrating with Okta for identity. Delivered phased migration plan from legacy MPLS/VPN to Zscaler platform, projected to reduce security infrastructure costs by 28%.

Project 2: Zero Trust Maturity Assessment (2022)

Conducted zero trust maturity assessments for 3 financial services clients using CISA Zero Trust Maturity Model. Identified critical gaps in network segmentation, identity governance, and workload security. Delivered prioritized roadmaps adopted by all three clients.

Project 3: SASE Vendor POC (2023)

Designed and executed a competitive proof-of-concept comparing Zscaler and Palo Alto Prisma Access for a 5,000-user enterprise client. Developed evaluation criteria covering performance, integration, DLP capabilities, and operational complexity. Delivered final recommendation report.

NOTE: This is a synthetic CV generated for academic research purposes. Personal identifiers (name, photo, gender, age, nationality, marital status) have been intentionally omitted to protect candidate privacy and ensure bias-free evaluation.
