

CANDIDATE ID: CV08 | LEVEL: INTERMEDIATE (SEMI-SENIOR) | PROFILE: Security Engineer (SecOps)

PROFESSIONAL SUMMARY

Security Engineer with 4.5 years of experience in security operations, incident response, and SecOps platform engineering. Deep expertise in SIEM architecture, EDR deployment and tuning, and security automation. Experienced working within MSSP environments supporting enterprise clients across multiple industries. Growing expertise in DLP, email security, and Privileged Access Management (PAM) tooling. Comfortable bridging the operational and engineering sides of cybersecurity — both building detection capabilities and responding to real-world threats.

EDUCATION

Bachelor of Science in Information Technology, Cybersecurity Track

Graduation Year: 2019

WORK EXPERIENCE

Security Engineer (L2)

Managed Security Services Provider (MSSP) | Mar 2021 – Present (3.5 years)

- Engineered, tuned, and maintained SIEM deployments (Splunk Enterprise Security, Microsoft Sentinel) for 8 enterprise clients.
- Developed and optimized detection content: correlation rules, custom dashboards, and threat hunting queries (SPL, KQL).
- Deployed and managed CrowdStrike Falcon EDR across 6,000+ endpoints, including policy configuration and incident investigation workflows.
- Implemented and maintained DLP solutions (Symantec DLP, Microsoft Purview DLP) for financial services clients with strict data handling requirements.
- Configured and managed Privileged Access Management (CyberArk) for a 300-seat enterprise deployment, including vault onboarding and session recording.
- Led incident response engagements for ransomware, BEC, and insider threat cases.
- Mentored junior analysts and developed SOC playbooks for 15+ alert types.

SOC Analyst – Tier 1/2

Financial Institution | Jul 2019 – Feb 2021

- Monitored and triaged security alerts across SIEM, IDS/IPS, and DLP platforms.
 - Investigated phishing, malware, and unauthorized access incidents.
 - Escalated and coordinated with Tier 3 and legal/compliance teams.
 - Contributed to monthly threat intelligence briefings.
-

TECHNICAL SKILLS

SIEM: Splunk ES (advanced), Microsoft Sentinel (advanced),

IBM QRadar (intermediate)

EDR/XDR: CrowdStrike Falcon (advanced), Microsoft Defender XDR, SentinelOne (intermediate)

DLP: Microsoft Purview DLP, Symantec DLP, Forcepoint DLP (basic)

PAM: CyberArk (intermediate), BeyondTrust (basic)

Email Security: Proofpoint, Microsoft Defender for Office 365, Mimecast

Threat Intelligence: MITRE ATT&CK, STIX/TAXII, threat feed integrations

Automation/SOAR: Splunk SOAR, Microsoft Sentinel Playbooks (Logic Apps),

Python for automation

Networking: Packet analysis (Wireshark), IDS/IPS (Suricata, Snort), firewall log analysis

Cloud Security: Azure Defender, AWS GuardDuty, basic GCP Security Command Center

Compliance: NIST CSF, PCI DSS, SOC 2 (operational exposure)

SOFT SKILLS

- High-pressure incident management with structured communication
 - Detail-oriented log analysis and forensic investigation
 - Cross-functional collaboration with IT, legal, and compliance teams
 - Strong knowledge documentation and runbook authoring
 - Mentoring and training junior team members
 - Ability to multitask across multiple client environments
-

CERTIFICATIONS

- GIAC Security Essentials (GSEC) — 2020
 - GIAC Certified Incident Handler (GCIH) — 2021
 - Splunk Core Certified Advanced Power User — 2022
 - CrowdStrike Certified Falcon Administrator — 2022
 - Microsoft SC-200 (Security Operations Analyst) — 2021
-

LANGUAGES

- English: Full professional proficiency (C1)
 - Spanish: Native
 - French: Basic (A2)
-

RELEVANT PROJECTS

Project 1: SIEM Migration – QRadar to Splunk ES (2022)

Led migration of 2 enterprise clients from IBM QRadar to Splunk Enterprise Security. Re-created 60+ detection rules, rebuilt dashboards, and retrained SOC analysts. Achieved zero-downtime migration over 6 weeks.

Project 2: Ransomware Response Playbook Development (2022)

Developed comprehensive ransomware incident response playbook covering detection, containment, eradication, and recovery phases. Integrated automated isolation workflows in Splunk SOAR, reducing initial response time from 45 minutes to under 8 minutes.

Project 3: DLP Implementation for Financial Client (2023)

Deployed Microsoft Purview DLP for a 1,200-user bank, covering SharePoint, Teams, Exchange, and endpoint DLP. Developed 25 data classification policies and tuned false positives to below 3% within 60 days of go-live.
