

CANDIDATE ID: CV11 | LEVEL: INTERMEDIATE (SEMI-SENIOR) | PROFILE: IT Systems Engineer (Security Focus)

PROFESSIONAL SUMMARY

IT Systems Engineer with 5 years of experience managing enterprise infrastructure including servers, virtualization, networking, and endpoint security. Competent in Active Directory, Microsoft 365 administration, and basic firewall management. Security knowledge gained primarily through operational IT responsibilities rather than dedicated security engineering. Currently transitioning toward a security specialization with growing knowledge of endpoint detection, identity management, and network access control. Strong operational experience complements developing security skills.

EDUCATION

Bachelor of Science in Information Systems
Graduation Year: 2018

WORK EXPERIENCE

IT Systems Engineer (Mid-Level)

Manufacturing Company (500 employees) | Jan 2020 – Present (4.5 years)

- Managed Windows Server 2019/2022 environments including Active Directory, Group Policy, DNS, DHCP, and Certificate Services (PKI).
- Administered VMware vSphere environment (60 VMs) and Veeam backup solutions.
- Managed Microsoft 365 tenant: Exchange Online, Teams, SharePoint, Intune.
- Configured and maintained Cisco switches (VLANs, trunking, STP) and Fortinet FortiGate firewall with basic policy management.
- Deployed Microsoft Intune for endpoint management and basic MDM policies.
- Responded to endpoint security incidents: malware removal, account compromise, and phishing response.
- Managed Fortinet FortiClient VPN for 150 remote users.
- Supported yearly internal audits by providing IT control evidence.
- Coordinated with external MSP for advanced network and security issues.

Junior Systems Administrator

Small IT Consulting Firm | Jul 2018 – Dec 2019

- Deployed and configured workstations, servers, and network equipment for small and medium business clients.
- Configured basic firewall rules on Cisco and Ubiquiti equipment.
- Provided technical support and user training.

TECHNICAL SKILLS

Infrastructure: Windows Server (2016/2019/2022), Active Directory, GPO, DNS, DHCP, PKI, VMware vSphere, Hyper-V
Microsoft 365: Exchange Online, Teams, SharePoint, OneDrive, Intune (MDM/MAM), Azure AD, Defender for Business
Networking: Cisco switches (VLAN, STP, LACP), basic FortiGate firewall management, TCP/IP, basic BGP/OSPF awareness
Security (growing): Microsoft Defender for Endpoint, basic CrowdStrike (exposure) FortiClient VPN, Nessus (basic vulnerability scanning)
Backup/Recovery: Veeam Backup, Azure Backup
Monitoring: Zabbix, SolarWinds (basic), Windows Event Viewer
Cloud (basic): Azure (VMs, storage, AAD, basic Defender for Cloud)
Scripting: PowerShell (intermediate), basic Python

SOFT SKILLS

- Reliable, detail-oriented approach to system administration tasks

- Good communication with end users and vendors
- Ability to manage multiple priorities in a dynamic environment
- Methodical troubleshooting and root cause analysis
- Team player with a helpful, service-oriented mindset
- Commitment to continuous learning in security topics

CERTIFICATIONS

- Microsoft Azure Administrator (AZ-104) — 2021
- Microsoft 365 Certified: Enterprise Administrator Expert (MS-102) — 2022
- CompTIA Security+ — 2021
- VMware VCP-DCV — 2020

LANGUAGES

- English: Professional working proficiency (B2)
- Spanish: Native

RELEVANT PROJECTS

Project 1: Microsoft Intune MDM Rollout (2021)
Led the deployment of Microsoft Intune for 350 corporate devices (Windows and iOS). Configured compliance policies, conditional access, and app protection policies. Reduced unmanaged device risk by achieving 95% MDM enrollment within 3 months.

Project 2: Active Directory Security Hardening (2022)
Conducted an AD security review and implemented hardening measures: disabled NTLM authentication on domain controllers, configured LAPS for local admin passwords, and enforced Tier 0/1/2 admin model.

Project 3: FortiGate Firewall Policy Review (2023)
Performed internal review of 180 FortiGate firewall rules, identifying 10 overly permissive policies including unnecessary any-to-any rules. Implemented tighter source-destination controls after change management approval.
