

CANDIDATE ID: CV14 | LEVEL: INTERMEDIATE (SEMI-SENIOR) | PROFILE: Senior Network Security Engineer (SD-WAN/SASE)

PROFESSIONAL SUMMARY

Network Security Engineer with 6 years of experience specializing in SD-WAN deployment, SASE architecture design, and enterprise firewall management. Deep technical expertise with Fortinet Security Fabric including FortiGate, FortiManager, FortiAnalyzer, and FortiSASE. Experienced supporting international projects and pre-sales technical activities including proof-of-concept labs, competitive evaluations, and customer technical workshops. Comfortable working with field sales teams and delivering technical presentations to enterprise decision-makers.

EDUCATION

Bachelor of Engineering in Network Engineering and Cybersecurity

Graduation Year: 2017

WORK EXPERIENCE

Senior Network Security Engineer (Pre-Sales Support)

VAR / Systems Integrator – Network Security Practice | Mar 2020 – Present (4 years)

- Provided pre-sales technical support for Fortinet and Palo Alto platforms for enterprise, government, and education sector clients.
- Designed and delivered proof-of-concept environments for SD-WAN, FortiSASE, and ZTNA solutions to support sales opportunities.
- Led technical workshops and demos for audiences of 10–200 people including CISOs, network architects, and operations engineers.
- Designed multi-site SD-WAN architectures with application-aware routing, SLA-based path selection, and zero-touch provisioning.
- Integrated SASE security stack (SWG, CASB, ZTNA, FWaaS) for cloud-first enterprise clients migrating from legacy perimeter security.
- Authored technical solution guides and competitive analysis documents.
- Achieved partner certification status in Fortinet and Palo Alto.

Network Security Engineer

Telecommunications Carrier | Jul 2017 – Feb 2020

- Managed Cisco ASA, FortiGate, and Juniper SRX firewall environments for enterprise managed security service customers.
- Configured IPsec VPN hub-and-spoke and mesh topologies for multi-branch enterprises.
- Implemented QoS, traffic shaping, and policy-based routing for WAN optimization.
- Troubleshoot BGP, OSPF, and MPLS routing issues in carrier-grade environments.
- Provided 24/7 on-call support for critical enterprise network security incidents.

TECHNICAL SKILLS

Fortinet Security Fabric: FortiGate (expert), FortiManager, FortiAnalyzer, FortiAuthenticator, FortiClient EMS, FortiSASE

SD-WAN: Fortinet SD-WAN (expert): application steering, dynamic path selection, WAN health monitoring, zero-touch provisioning

ZTNA: FortiClient ZTNA, identity-based access policy design

SASE/SSE: FortiSASE, Zscaler (intermediate), Palo Alto Prisma Access (basic)

SWG/CASB/DLP: Web filtering policy design, CASB integration, basic DLP

IAM Integration: SAML 2.0, LDAP/RADIUS, Azure AD, Okta, FortiAuthenticator

Routing/Switching: BGP, OSPF, MPLS, policy-based routing, QoS, VLANs

VPN: IPsec (IKEv1/IKEv2), SSL-VPN, ZTNA

Cloud Networking: AWS VPC (intermediate), Azure VNet (basic), cloud on-ramp for SD-WAN

Automation: Python (network automation), Ansible (basic), FortiManager APIs

SOFT SKILLS

- Excellent technical presentation and demonstration skills
 - Ability to engage and build rapport with technical and business audiences
 - Strong competitive positioning and objection handling capabilities
 - Detailed technical documentation and solution design authoring
 - Cross-cultural communication experience (international project support)
 - Proactive self-starter who anticipates technical objections
-

CERTIFICATIONS

- Fortinet NSE 7 – SD-WAN — 2021
 - Fortinet NSE 7 – Enterprise Firewall — 2020
 - Fortinet NSE 6 – FortiSASE — 2022
 - Palo Alto Networks PCNSE — 2021
 - Cisco CCNP Security — 2019
 - AWS Solutions Architect – Associate — 2022
-

LANGUAGES

- English: Full professional proficiency (C1)
 - Spanish: Native
 - Italian: Intermediate (B1)

RELEVANT PROJECTS

Project 1: Government SD-WAN POC (2022)

Designed and executed a 6-week proof-of-concept for a national government ministry evaluating SD-WAN solutions from Fortinet and Cisco Meraki. Built a 10-site lab environment simulating government WAN conditions. Fortinet was selected based on POC results, leading to a \$3M deployment contract.

Project 2: FortiSASE Pilot for Financial Services Client (2023)

Designed and delivered a FortiSASE pilot for a 2,000-user financial services firm transitioning from traditional proxy and VPN. Integrated FortiSASE with Azure AD for identity-based policy and demonstrated ZTNA replacing legacy SSL-VPN. Client proceeded with full deployment.

Project 3: Competitive SD-WAN Workshop Series (2023)

Developed and delivered a 12-city technical workshop series comparing Fortinet SD-WAN with Cisco and VMware VeloCloud. Attendance averaged 80 network engineers per event. Generated 35 qualified pipeline opportunities for the sales team.
