

CANDIDATE ID: CV15 | LEVEL: INTERMEDIATE (SEMI-SENIOR) | PROFILE: Security Data Analyst / BI Analyst

PROFESSIONAL SUMMARY

Business Intelligence and Security Data Analyst with 5 years of experience developing analytics solutions and reporting capabilities, with the last 2 years focused on security analytics within a SOC environment. Bridges BI and cybersecurity by building threat intelligence dashboards, security metrics programs, and automated reporting pipelines for security leadership. Experienced with Splunk, Power BI, and Python for security data analysis and visualization. Not a network security engineer or security architect, but provides strong analytical support to security teams.

EDUCATION

Bachelor of Science in Data Science

Graduation Year: 2018

Certificate in Cybersecurity Analytics

Duration: 4 months, completed 2021

WORK EXPERIENCE

Security Data Analyst

Financial Services Group – Cybersecurity Division | Jan 2022 – Present (2.5 years)

- Developed and maintained executive security dashboards in Power BI tracking mean time to detect (MTTD), mean time to respond (MTTR), vulnerability exposure, and incident trends.
- Built SPL (Splunk Processing Language) queries and dashboards for SOC operations: alert volume analysis, analyst performance, detection coverage.
- Automated security reporting workflows in Python, replacing 15 hours/week of manual report preparation.
- Performed threat intelligence data analysis: aggregating feeds from CrowdStrike Intelligence, FS-ISAC, and internal threat data.
- Created data visualizations for board-level and CISO security reports.
- Collaborated with SOC team to identify detection gaps through data analysis.
- Supported compliance reporting for PCI DSS and SOX audit evidence.

Senior BI Analyst

Retail Group | Aug 2018 – Dec 2021

- Built and maintained 40+ Power BI dashboards for commercial, finance, and operations teams.
 - Designed data models in Snowflake using dbt.
 - Automated reporting pipelines with Python and Apache Airflow.
 - Led a GDPR compliance data inventory project across analytics systems.
 - Trained and mentored a team of 3 junior analysts.
-

TECHNICAL SKILLS

Security Analytics: Splunk (SPL – intermediate), Microsoft Sentinel (KQL – basic), security metrics program design, threat intel analysis

BI/Visualization: Power BI (advanced), Tableau (intermediate), Looker (basic)

Data Engineering: Python (Pandas, NumPy, Matplotlib, Plotly), SQL (advanced), Apache Airflow (intermediate), dbt (intermediate)

Data Warehousing: Snowflake, BigQuery, Redshift, SQL Server

Threat Intelligence: CrowdStrike Intelligence, FS-ISAC integration,

MITRE ATT&CK (data analysis perspective)

Security Frameworks: PCI DSS (reporting), SOX (IT controls reporting),

NIST CSF (metrics mapping)

Tools: Jupyter Notebooks, Git, Jira, Confluence

SOFT SKILLS

- Strong data storytelling and visual communication for executive audiences
 - Ability to translate security operational data into business insights
 - Collaborative bridge between security operations and business leadership
 - Rigorous approach to data quality in reporting
 - Clear written communication for reports and documentation
 - Continuous curiosity about cybersecurity threat landscape
-

CERTIFICATIONS

- Microsoft Power BI Data Analyst Associate (PL-300) — 2019
 - Splunk Core Certified Power User — 2022
 - CompTIA Security+ — 2021
 - Google Data Analytics Professional Certificate — 2019
-

LANGUAGES

- English: Full professional proficiency (C1)
 - Spanish: Native
 - Portuguese: Intermediate (B1)
-

RELEVANT PROJECTS

Project 1: CISO Security Metrics Dashboard (2022)

Built a comprehensive Power BI dashboard for the CISO presenting 30+ security KPIs across vulnerability management, incident response, threat detection, and compliance domains. Dashboard adopted as standard monthly board reporting tool.

Project 2: SOC Performance Analytics Platform (2023)

Developed a Splunk-based analytics platform for SOC management tracking analyst workload, alert escalation rates, MTTD/MTTR by alert category, and false positive rates. Enabled data-driven staffing and tuning decisions.

Project 3: Threat Intelligence Aggregation Pipeline (2023)

Built a Python pipeline aggregating threat intelligence from 5 sources (CrowdStrike, FS-ISAC, AlienVault OTX, VirusTotal, internal SIEM) into a unified analysis layer in Snowflake. Enabled automated IOC correlation reporting for the SOC team.

NOTE: This is a synthetic CV generated for academic research purposes. Personal identifiers (name, photo, gender, age, nationality, marital status) have been intentionally omitted to protect candidate privacy and ensure bias-free evaluation.
