

CANDIDATE ID: CV19 | LEVEL: SENIOR | PROFILE: Senior Software Architect (Security-Adjacent)

PROFESSIONAL SUMMARY

Senior Software Architect with 12 years of experience designing large-scale distributed systems, cloud-native platforms, and enterprise integration architectures. Deep expertise in microservices, event-driven architecture, and cloud platforms (AWS, Azure). Security expertise is application and infrastructure focused: identity federation (OAuth 2.0, OIDC, SAML), API security, zero-trust application access patterns, and cloud security posture. No dedicated network security or pre-sales background. Proven technical leadership skills with experience managing architecture teams, driving technology strategy, and collaborating with CISO and security teams to embed security into software delivery lifecycle. Strong communicator and thought leader in cloud-native architecture.

EDUCATION

Master of Science in Computer Science (Distributed Systems specialization)

Graduation Year: 2012

Bachelor of Science in Systems Engineering

Graduation Year: 2010

WORK EXPERIENCE

Principal Software Architect / Distinguished Engineer

Global Technology Company (Fortune 100) | Feb 2018 – Present (6 years)

- Defined the enterprise cloud-native architecture strategy adopted across 200+ engineering teams (5,000+ engineers).
- Designed identity and access architecture for a multi-cloud environment (AWS and Azure) using OAuth 2.0, OIDC federation, and Okta as central IdP.
- Led the design of zero-trust application access architecture for internal services, replacing VPN-based access with service mesh mTLS and API gateway authorization policies.
- Collaborated with CISO office to embed security architecture reviews into the software delivery lifecycle.
- Designed API security standards: rate limiting, OAuth scopes, JWT validation, API gateway policies, and certificate lifecycle management.
- Authored enterprise architecture standards adopted by 50+ product teams.
- Mentored 20+ senior engineers and architects across the organization.
- Represented the organization at AWS re:Invent, KubeCon, and QCon.

Lead Software Engineer / Architect

E-commerce Platform (Scale-up) | Jan 2014 – Jan 2018 (4 years)

- Designed and led development of a microservices platform serving 100M+ monthly active users.
- Built OAuth 2.0 authorization server and implemented PKCE flows for mobile and SPA clients.
- Led the migration from monolithic architecture to event-driven microservices using Kafka.
- Designed the platform's API gateway layer with rate limiting, authentication, and routing.

Backend Developer

Software Consultancy | Jun 2010 – Dec 2013 (3.5 years)

- Developed enterprise applications using Java (Spring) and Python.
- Delivered integration solutions for financial services clients.
- Contributed to security hardening of banking web applications.

TECHNICAL SKILLS

Architecture: Microservices, event-driven, CQRS/Event Sourcing, API design, distributed systems, cloud-native, service mesh (Istio)
Cloud: AWS (expert: EC2, ECS, EKS, Lambda, API GW, IAM, VPC, RDS, S3, SQS, MSK, CloudFront, Route53, Security Hub)
Azure (intermediate: AKS, Service Bus, API Management, AAD)
Identity/Security: OAuth 2.0, OIDC, SAML 2.0, JWT, PKCE, mTLS, service accounts, Okta, Auth0, Azure AD, AWS Cognito
API security design, zero-trust application patterns
Container/K8s: Kubernetes (advanced), Helm, Istio, Kustomize, Argo CD
IaC: Terraform (advanced), AWS CDK, CloudFormation
Languages: Java (expert), Python (advanced), Go (intermediate), TypeScript (intermediate)
Databases: PostgreSQL, DynamoDB, Redis, Cassandra, Elasticsearch
Messaging: Apache Kafka, AWS SQS/SNS, Azure Service Bus

SOFT SKILLS

- Strategic technology vision and architecture leadership
 - Excellent communication of complex technical concepts to diverse audiences
 - Ability to align engineering teams around architectural standards
 - Collaborative engagement with security, product, and business stakeholders
 - Published author of engineering blog posts and conference speaker
 - Strong mentoring and technical development of engineering talent
-

CERTIFICATIONS

- AWS Certified Solutions Architect – Professional — 2017, renewed 2021
 - AWS Certified Security – Specialty — 2019
 - Certified Kubernetes Administrator (CKA) — 2020
 - TOGAF 9.2 Certified — 2018
 - Google Professional Cloud Architect — 2021
-

LANGUAGES

- English: Native
 - French: Full professional proficiency (C1)
 - Spanish: Intermediate (B1)
-

RELEVANT PROJECTS

Project 1: Enterprise Zero Trust Application Access Architecture (2021)
Designed a zero-trust application access model replacing VPN for 5,000 internal users. Used service mesh mTLS, OPA-based authorization policies, and OIDC identity propagation. Reduced lateral movement risk and improved access auditability. Architecture adopted as enterprise standard.

Project 2: OAuth 2.0 Authorization Platform (2018)
Built a central OAuth 2.0 authorization server supporting 200+ client applications and 100M+ users. Implemented all major flows (Authorization Code + PKCE, Client Credentials, Device Flow) with sub-50ms token issuance. Became the identity foundation for the entire product platform.

Project 3: Cloud-Native Security Architecture Framework (2022)
Authored a 50-page enterprise cloud-native security architecture framework covering identity, workload security, data protection, network controls, and supply chain security. Adopted as the mandatory architecture reference for all new product development.

NOTE: This is a synthetic CV generated for academic research purposes. Personal identifiers (name, photo, gender, age, nationality, marital status) have been intentionally omitted to protect candidate privacy and ensure bias-free evaluation.
