

CANDIDATE ID: CV20 | LEVEL: SENIOR | PROFILE: Senior Consulting Systems Engineer (Network Security)

PROFESSIONAL SUMMARY

Senior Consulting Systems Engineer with 13 years of experience in network security architecture, pre-sales technical leadership, and enterprise security transformation. Recognized subject matter expert in SASE/SSE, SD-WAN, ZTNA, and cloud security integration with both Fortinet and competing platforms. Extensive international pre-sales experience serving global enterprise, service provider, and government accounts across LATAM, EMEA, and North America. Distinguished track record leading technical wins on strategic opportunities exceeding \$10M, delivering technical training and mentoring to field systems engineers worldwide, and influencing product roadmap direction through structured field feedback. Exceptional communicator with experience presenting at major industry conferences, authoring widely-distributed technical whitepapers, and acting as the voice of the international technical organization to executive leadership.

EDUCATION

Master of Science in Network Security and Cryptography

Graduation Year: 2011

Bachelor of Engineering in Computer Networks

Graduation Year: 2009

Advanced Executive Program: Enterprise Sales Engineering Leadership

(Top-tier business school, 6-month program) — Completed 2018

WORK EXPERIENCE

Principal Consulting Systems Engineer – International

Global Network Security Vendor (Top 3 in Gartner Magic Quadrant) | Jan 2017 – Present (7.5 years)

- Served as the most senior technical resource for the International Sales Organization, supporting strategic accounts and critical opportunities across 40+ countries in LATAM, EMEA, and APAC.
- Acted as subject matter expert in pre-sales design reviews for SASE, SD-WAN, Zero Trust, and cloud security, providing technical authority and leadership to field SE teams in competitive engagements.
- Led the architecture and design of SASE/SSE solutions for organizations with 10,000–500,000 users, integrating SWG, CASB, ZTNA, FWaaS, DLP, and RBI components across cloud and on-premises environments.
- Delivered technical training and enablement for 50+ field SEs worldwide at regional events, annual SE summits, and virtual training programs.
- Served as Virtual Team Leader and technical spokesperson for the International SE organization in executive meetings, product committees, and partner forums.
- Worked directly with Product Management and Engineering to identify, qualify, and advocate for 20+ field-critical features incorporated into product roadmap.
- Authored 12 high-impact technical whitepapers (including SD-WAN, ZTNA, SASE, Cloud Security Integration, and Multi-Vendor Interoperability) distributed to 50,000+ customers and partners globally.
- Interfaced with Business and Technology partners in SD-WAN, identity, and cloud security domains, disseminating technology knowledge to field SEs.
- Traveled internationally (Americas, Europe, Middle East, Asia) on short notice for strategic engagements, supporting \$200M+ annual pipeline.
- Provided biweekly status reports and pipeline commentary to VP of SE.
- Led technical competitive positioning against Zscaler, Palo Alto Prisma Access, Netskope, Cisco, and Microsoft, achieving 70%+ win rate in tracked opportunities.

Senior Network Security Architect

Global Financial Services Firm | Mar 2013 – Dec 2016 (3.75 years)

- Led global network security architecture for a 90,000-user multinational bank with operations in 60 countries.
- Designed and deployed a unified SD-WAN/SASE architecture replacing legacy MPLS circuits across 150 branches, achieving \$8M annual WAN cost reduction.
- Architected a zero-trust network access solution for 20,000 remote users, integrating with Okta and Azure AD for identity-based policy enforcement.
- Led integration of CASB and DLP solutions with SaaS platform access control.
- Managed 6 senior network security engineers and collaborated with CISO office.
- Represented network security in enterprise architecture governance board.

Network Security Engineer (Lead)

Telecom Operator – Enterprise Security Division | Sep 2009 – Feb 2013 (3.5 years)

- Managed enterprise security services for 80+ corporate customers.
- Deployed and operated Cisco, Fortinet, and Juniper firewall platforms.
- Led BGP and OSPF routing design for carrier-grade security service delivery.
- Developed managed security service catalog and customer SLA frameworks.
- Trained and mentored 5 junior security engineers.

TECHNICAL SKILLS

SASE/SSE (Expert): Full SASE/SSE architecture: SWG, CASB, FWaaS, ZTNA, DLP, RBI, Secure DNS, Shadow IT; vendor-agnostic design

Deep expertise: Fortinet FortiSASE, Zscaler (ZIA/ZPA/ZDX),

Palo Alto Prisma Access, Netskope, Cisco Umbrella,

Cloudflare One, Microsoft Entra Private Access

SD-WAN (Expert): Fortinet SD-WAN (expert): application-aware routing,

dynamic path selection, WAN health, ZTP, multi-WAN;

Cisco SD-WAN (Viptela), VMware VeloCloud, Silver Peak

Zero Trust / ZTNA: NIST SP 800-207 framework, CISA ZTMM, identity-centric

policy, micro-segmentation, identity-aware proxy

Firewalls/NGFW: Fortinet (expert), Palo Alto Networks, Cisco FTD/ASA,

Check Point, Juniper SRX — multi-vendor architecture

IAM Integration: SAML 2.0, OAuth 2.0, OIDC, Azure AD/Entra ID, Okta,

Ping Identity, Duo MFA, SCIM 2.0, conditional access

SWG/CASB/DLP: Cloud access security policy design, inline CASB,

shadow IT remediation, data classification, DLP policy

Cloud Networking: AWS (Transit Gateway, Direct Connect, PrivateLink,

Security Hub, WAF, Inspector, Shield)

Azure (Virtual WAN, ExpressRoute, Defender for Cloud,

Entra ID, Conditional Access)

GCP (Cloud Armor, VPC SC, Interconnect)

SIEM/XDR: Splunk ES, Microsoft Sentinel, Fortinet FortiSIEM,

CrowdStrike XDR (integration experience)

Automation: Python (advanced: network automation, API integrations,

data processing for whitepapers)

Terraform (infrastructure design), Ansible,

Fortinet FortiManager APIs, Zscaler APIs, Panorama APIs

Routing/Switching: BGP (expert), OSPF, MPLS, IS-IS, multi-homing,

policy-based routing, QoS, VLANs, LACP

VPN Technologies: IPsec (IKEv1/IKEv2), SSL-VPN, ZTNA (all major vendors),

DMVPN (Cisco), SD-WAN underlay

Documentation: Whitepaper authoring, solution design guides,

RFP technical responses, executive briefings

SOFT SKILLS

- World-class technical communication for executive, C-suite, and board audiences
- International pre-sales leadership with deep cultural adaptability
- Strategic thought leadership recognized at industry conferences (RSA, Gartner, Fortinet Accelerate, regional events in 20+ countries)
- Ability to mentor, inspire, and technically enable field SE teams globally

- Political intelligence and relationship management in complex multi-stakeholder enterprise and government environments
 - Disciplined approach to pipeline reporting and technical opportunity qualification
 - Intellectual rigor and clarity in whitepaper authoring and technical documentation
 - Resilience and adaptability in high-velocity, high-stakes international travel and deal cycle environments
-

CERTIFICATIONS

- CISSP (Certified Information Systems Security Professional) — 2012, renewed 2024
 - CCIE Security #47821 (Cisco Certified Internetwork Expert – Security) — 2015
 - Fortinet NSE 8 (Network Security Expert) — 2019, recertified 2022
 - Palo Alto PCNSE — 2017, renewed 2021
 - Zscaler Zero Trust Certified Architect (ZTCA) — 2021
 - AWS Advanced Networking Specialty — 2018
 - AWS Security Specialty — 2020
 - TOGAF 9.2 Certified — 2019
 - GIAC Security Expert (GSE) — 2016
-

RELEVANT PROJECTS

Project 1: SASE Global Transformation – Sovereign Wealth Fund (500,000 users, 2022-2023)

Principal architect and technical lead for the largest SASE deployment in the Middle East: a 500,000-user sovereign wealth fund transitioning from legacy perimeter security to a fully cloud-delivered SASE model. Designed full-stack architecture including SWG, CASB, ZTNA, FWaaS, and DLP. Integrated with on-premises data sovereignty requirements. Led a 10-person SE delivery team. Estimated \$45M total project value.

Project 2: SE Technical Enablement Program – 50 Engineers, 3 Regions (2022-2023)

Designed and delivered a 60-hour technical enablement curriculum for 50 field SEs across LATAM, EMEA, and APAC. Modules covered SASE architecture, SD-WAN design, ZTNA implementation, competitive positioning, and executive presentation skills. Post-program win rates in competitive deals improved by 28% within the following two quarters.

Project 3: Whitepaper Library – SASE & Zero Trust Series (2020-2024)

Authored a 12-whitepaper technical series covering all aspects of SASE and zero trust transformation: architecture components, migration strategies, competitive analysis, identity integration, cloud on-ramp design, and operational considerations. Combined global distribution: 50,000+ downloads across 80 countries. Series generated direct attribution of \$30M+ in pipeline.

Project 4: International Government ZTNA Program (2023)

Led the technical design and advisory for a zero-trust network access program spanning 5 national government ministries (combined 40,000 users). Coordinated with 3 different identity providers (Azure AD, Okta, a local sovereign IdP) and designed a unified ZTNA policy framework meeting sovereign data requirements.

Project 5: SD-WAN Product Feedback & Feature Roadmap Contribution (Ongoing)

As Virtual Team Leader for the International SE organization, established a systematic field feedback process collecting technical requirements from 50+ SEs globally. Submitted 20+ prioritized feature requests to Product Management. 15 features incorporated into product releases, including SD-WAN application steering improvements adopted as a differentiator in competitive evaluations.

NOTE: This is a synthetic CV generated for academic research purposes. Personal identifiers (name, photo, gender, age, nationality, marital status) have been intentionally omitted to protect candidate privacy and ensure bias-free evaluation.
